DERMAL TREATMENT *menu*

LED Light Therapy

The Lutronic Healite II is a medical-grade LED light therapy device designed to improve skin health and accelerate healing. It utilises two key wavelengths: Blue Light (415nm) and Infrared Light (830nm).

- Blue Light (415nm): Primarily targets acne-causing bacteria, reducing inflammation and promoting clearer skin. It is often used for acne treatments and bacterial issues.
- Infrared Light (830nm): Penetrates deeper layers of the skin, stimulating collagen production and aiding in tissue repair. It is helpful for reducing pain, inflammation, and promoting overall skin rejuvenation.

A combination of light therapies makes the Healite II effective for a variety of skin conditions, including acne, wound healing, and anti-aging. This treatment is non-invasive with no need for downtime post appointment.

Pricing:

ADD ON LED | 15 minutes | \$40

Standard LED (incl. pre & post care) | 30 minutes | \$70

Complimentary 30 minute Dermal Consultations Available!

Laser & IPL

At Herstellen Clinic we have two medical grade laser machines, each serving our patients in various ways.

The Quanta Q-Plus laser system is a professional-grade, multi-wavelength laser platform commonly used in dermatology and aesthetic medicine for tattoo removal, pigmented lesion treatment, and skin rejuvenation. It features Q-switched technology, delivering ultra-short, high-energy pulses that create a photoacoustic effect which shatters pigment and ink particles without damaging surrounding tissue.

Pricing:

Spot Treatment | < 15 minutes | \$70

Partial Area | 30 minutes | \$160

Full Face | 45 minutes | \$280

Additional areas quoted accordingly during consultation

The Cutera Xeo laser system supports multiple treatment options, including the 1064 nm Nd: YAG laser for treating vascular lesions, and skin rejuvenation, scarring and stretch marks, which is effective and safe for all skin types, including darker tones. The system also features IPL for treating sun damage, pigmentation and redness on lighter skin, and the Titan handpiece, using infrared light which stimulates collagen production.

Pricing:

Spot Treatment | < 15 minutes | \$70

Partial Area | 30 minutes | \$160

Full Face | 30 minutes | \$280

Additional areas quoted accordingly during consultation

Complimentary 30 minute Dermal Consultations Available!

ASAP Microdermabrasion

ASAP Micro+ combines microdermabrasion and sonophoresis for enhanced skin rejuvenation. The microdermabrasion exfoliates to remove dead skin cells, improving texture and promoting cell renewal. Sonophoresis uses ultrasound to boost the absorption of skincare ingredients, delivering deeper hydration and nourishment. Together, these treatments smooth the skin, reduce fine lines and blemishes, and enhance the effectiveness of skincare products for a more radiant, youthful appearance. This treatment is non-invasive with no need for downtime post appointment.

Pricing:

30 minutes | \$150

ADD ON - LED | 15 minutes | \$40

Microneedling

MDerma by Dermapen is a microneedling treatment designed to improve skin texture and appearance by creating micro-injuries in the skin, stimulating collagen production and promoting skin regeneration. This process helps address concerns like fine lines, acne scars, pigmentation, post surgical scarring, stretch marks and overall skin tone. MDerma is often used for its minimally invasive nature, requiring little downtime, and it can be customised for different skin types and conditions. This treatment requires a downtime of 24-48 hours.

Pricing:

Spot Treatment | 60 minutes | \$120

Full Face | 90 minutes | \$280

ADD ON - Neck | \$100

ADD ON - Neck & Decolletage | \$170

Duration includes 30 minute numbing/prep

the **SIGNATURE REFRESH** *facial*

Our Signature Refresh Facial is designed to rejuvenate and restore your skin with a powerful combination of advanced treatments that work synergistically to address a wide range of skin concerns, leaving your skin glowing, refreshed and youthful.

Pricing:

90 minutes | \$345

ADD ON - Neck & Decolletage | \$100

INCLUSIVE OF THE FOLLOWING TREATMENTS

Laser Genesis Treatment (Full Face)
Dermaceutic Milk Peel
Hydrating Mask
LED Light Therapy

Complimentary 30 minute Dermal Consultations Available!

Dermaceutic Milk Peel **(Superficial depth peel)**

The Dermaceutic Milk Peel is a mild chemical peel designed to exfoliate and rejuvenate the skin. It typically contains a blend of Glycolic, Lactic acid and Salicylic Acids, which help remove dead skin cells, improve skin texture, and promote radiance. It is often used to address issues like dullness, uneven tone, and fine lines, while being suitable for sensitive skin types due to its relatively gentle formulation. Results can include smoother, brighter skin with minimal downtime.

Pricing:

30 minutes | \$150

ADD ON - LED | 15 minutes | \$40

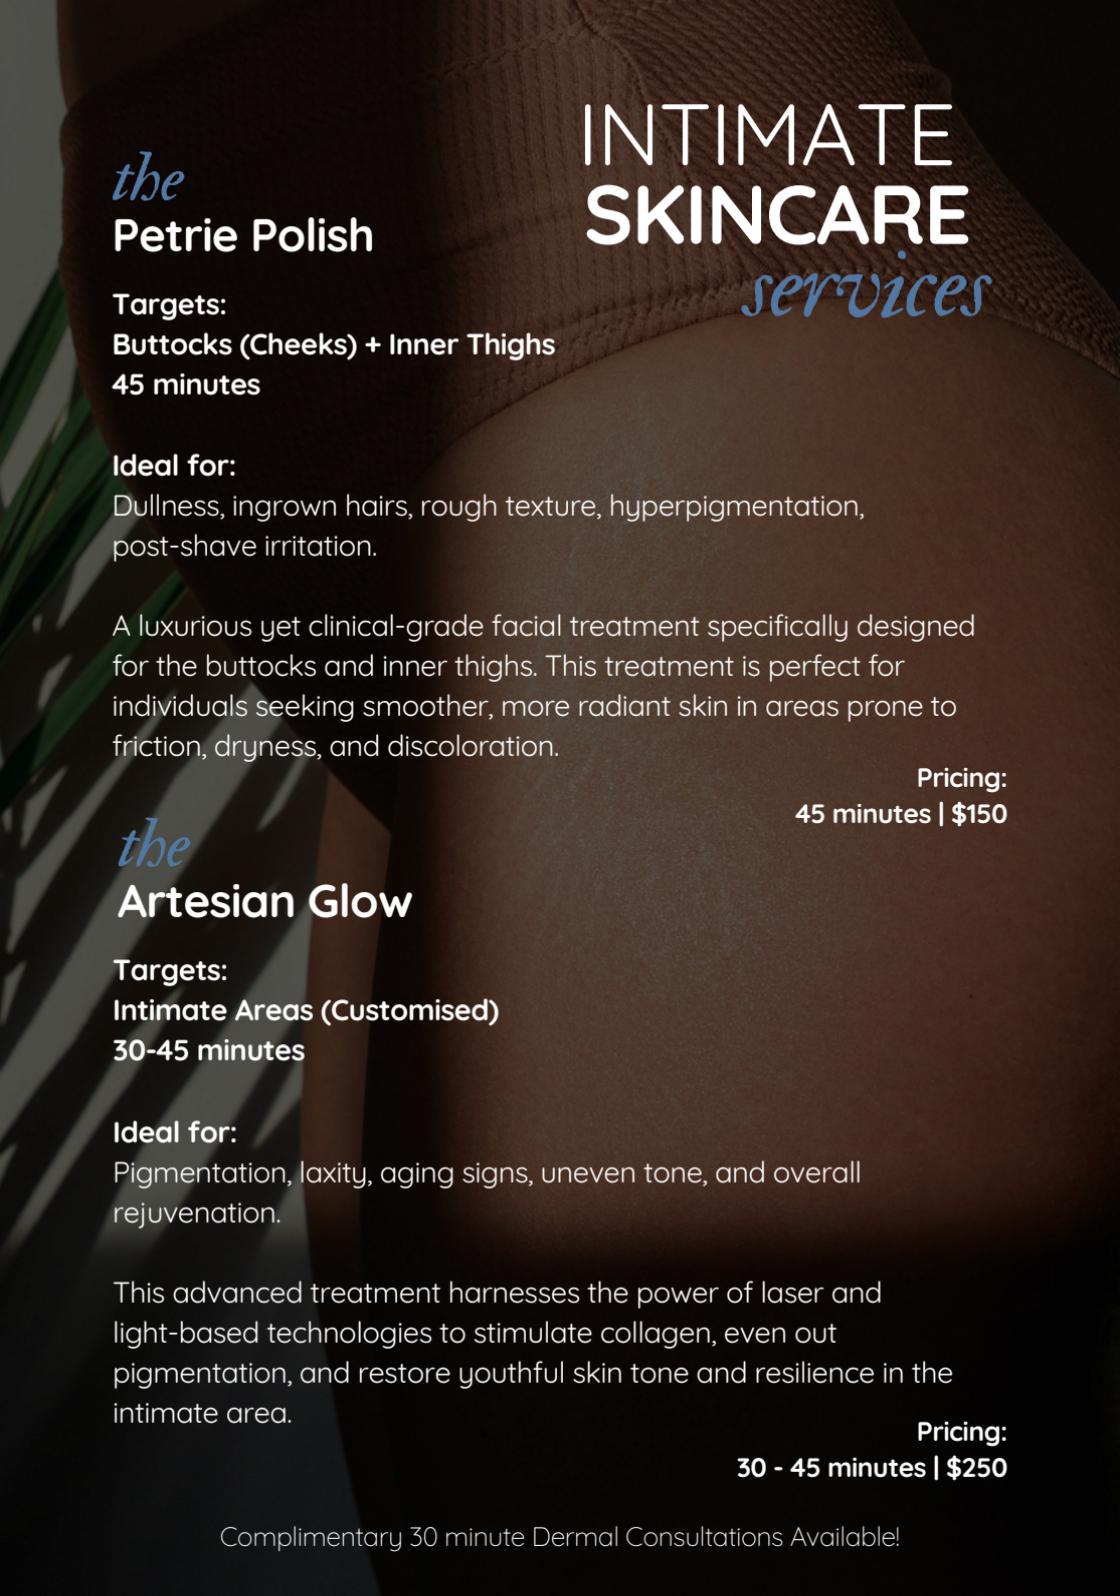

Dermaceutic Cosmo Peel TCA **(Superficial to medium depth peel)**

Dermaceutic Cosmo Peel TCA is a professional-grade chemical peel that combines trichloroacetic acid (TCA) with other active ingredients to improve skin texture and tone. It's designed to treat a variety of skin concerns, including fine lines, wrinkles, hyperpigmentation, and acne scars. The treatment stimulates skin renewal and collagen production, resulting in smoother, brighter, and more even skin. Typically administered by a skincare professional, it is ideal for those looking for more dramatic exfoliation and skin rejuvenation.

Pricing:

30 minutes | \$150

Complimentary 30 minute Dermal Consultations Available!

the
Petrie Polish

Targets:

Buttocks (Cheeks) + Inner Thighs

45 minutes

Ideal for:

Dullness, ingrown hairs, rough texture, hyperpigmentation, post-shave irritation.

A luxurious yet clinical-grade facial treatment specifically designed for the buttocks and inner thighs. This treatment is perfect for individuals seeking smoother, more radiant skin in areas prone to friction, dryness, and discoloration.

Pricing:

45 minutes | \$150

the
Artesian Glow

Targets:

Intimate Areas (Customised)

30-45 minutes

Ideal for:

Pigmentation, laxity, aging signs, uneven tone, and overall rejuvenation.

This advanced treatment harnesses the power of laser and light-based technologies to stimulate collagen, even out pigmentation, and restore youthful skin tone and resilience in the intimate area.

Pricing:

30 - 45 minutes | \$250

Complimentary 30 minute Dermal Consultations Available!

Sofwave™ (Skin tightening)

Sofwave™ is FDA cleared and clinically proven to remodel collagen, which improves facial lines and wrinkles, and lifts the eyebrows, submental, and neck area.

Using proprietary Synchronous Ultrasound Parallel Beam SUPERB™ technology, ultrasound energy precisely passes through the skin's surface (the epidermis), heating the mid-dermal tissue at just the precise depth and temperature to rejuvenate collagen fibers and improve the overall appearance of the skin.

Sofwave Packages

Sofwave™ Introductory Offer

PACKAGE OPTION ONE

Choice of your selected Sofwave area
+ additional 3 x LED Therapy Treatments & Complimentary Mask
([see over page for individualised Sofwave pricing](#))

PACKAGE OPTION TWO

Choice of your selected Sofwave area
+ additional Refresh Facial (Full face Laser Treatment, Peel & LED Therapy Treatment) & Complimentary Mask
([see over page for individualised Sofwave pricing](#))

Lower Face | \$1,750

Full Face | \$2,500

Full Face & Neck | \$3,500

Treatment duration is 60-90 minutes

benefits of **DERMAL THERAPY** *following* **POST OPERATIVE CARE**

All patients are offered a complimentary skin consultation from 2 weeks post surgery, in addition to a complimentary scar management treatment at 8+ weeks post surgery.

The below treatment methods are often used together for enhanced results, with visible improvements to the scar's texture, appearance, and overall skin tone. It is important for patients to note that multiple treatments are generally needed to achieve their desired outcome. Your dermal therapist will explain your treatment plan in detail with you during your skin consultation.

- **Nd: YAG Laser:** Utilises a 1064mm wavelength that penetrates deeply to remodel collagen, reduce redness from residual vascularity, and improve overall scar texture and tone with minimal epidermal disruption.
- **IPL: (Intense Pulsed Light):** Targets pigments and vascular components within the scar, helping to fade redness, reduce hyperpigmentation, and blend the scar more evenly with surrounding skin.
- **Microneedling:** Creates controlled micro-injuries that stimulate fibroblast activity and new collagen synthesis, softening the scar, improving pliability, and enhancing surface smoothness.

Pricing:

\$100 - \$440*
